

HH-1800

POWDER COAT CURING SYSTEM

PRODUCT OVERVIEW:

- High intensity hand-held portable curing unit
- Low cost 1800 watt entry-level unit for spot curing
- Cure adhesives, carbon fiber and teflon
- 1' x 1' spot coverage area
- Available 6' high accessory stand (sold separately) Part #14-1025
- UL listed

The Infrared Light Cure System will cure parts too large to fit in your oven or take the place of an oven. Infrared light cures the powder from the outside and generates high temperatures. Note: Conventional paint, gaskets, or plastic items close to the surface to be cured or attached to thin gauge metal should first be removed. Do not direct IR light at people or flammable material, or use in areas with flammable vapors closer than 25 feet.
