

SR-VI SR-VI IR

[Superseded by SR-6000 and SR-6000-IR]

SHORT WAVE PORTABLE INFRARED EQUIPMENT

PRODUCT OVERVIEW:

- Exclusive new iridium enhanced quartz halogen element
- 6,000 watts of short wave infrared
- Speed curing time 60%-80% faster
- 5' x 6' coverage area
- Solid state programmable control
- Infrared sensor provides precise control
- Heavy duty stand
- Energy efficient
- UL listed

Infratech's exclusive new Iridium elements feature recently declassified military technology which Infratech has been a part for 50 years; they put more energy into the work and less into visible light. These unique, highly efficient short wave infrared curing units increase curing efficiency and outperform other systems. 6000 watts of power 240 volts offers faster cure times by 60% to 80%. These units have solid state programmable controls with electronic timer, a coverage area

of 4' x 6', adjustable shock arm with extends to over 7' and are equipped with a 25' power cord. The SR-VI IR has the same quality features as the SR-VI but includes an infrared sensor that allows the technician to select and maintain a predetermined surface temperature until the curing is complete. Digital controls provide complete accuracy and are easy to set up and operate.

SPECIFICATIONS

PART NUMBER	MODEL	LENGTH	WATTS	VOLTS	AMPS	SHIPPING WEIGHT (LBS)
17-1300	SR-VI	36"	6,000	240 - 1 PH	25	190
17-1350	SR-VI-IR	36"	6,000	240 - 1 PH	25	190
