

NEW, ON-TREND COLORS, COPPER AND COOL GREY – AN INFRA TECH EXCLUSIVE.

[SEPTEMBER 25, 2018] GARDENA, CA - You've asked, and we've delivered. Today, the Infratech team is excited to announce the addition of two exclusive, brand new standard color offerings – Copper and Cool Grey. We are proud to add Copper and Cool Grey to our standard color lineup because these gorgeous, versatile hues have long been top choices among customers who place custom orders.

Infratech is the only comfort heat manufacturer that can offer such an extensive choice of on-trend colors, to seamlessly accent the décor of our customers' projects or properties. We are able to combine product quality and performance with design versatility because we specialize in custom color and fabrication. In addition to our wide range of standard color, mounting, and control options, we work directly with architects, designers and engineers to develop original heater shapes, colors and profiles that are unique to each specific project.

Copper and Cool Grey are the latest additions to a standard lineup of colors that includes: Brushed Stainless Steel, White, Biscuit, Almond, Beige, Black and Bronze. These exclusive new color options are a perfect addition to the nature-inspired design palettes popular today because they enable seamless visual continuity between indoor and outdoor spaces. Whether used in luxury residences or one-of-a-kind commercial properties like restaurants, hotels, resorts, entertainment venues and open-air mixed-use retail spaces, these new colors balance comfort with style.

-  Choose Cool Grey for a contemporary space that features chrome, brushed stainless, exposed steel, concrete or stone accents.
-  Copper can add warmth and polish to spaces with terracotta, stucco, wood, brick or other natural textures.
