

ENTERTAIN MORE OUTDOORS THIS SPRING WITH INFRATECH INFRARED HEATING SYSTEMS.

[DECEMBER 16, 2015] GARDENA, CA – From garden parties to Easter brunches or Passover Seders, al fresco cocktails to casual dinners on a patio or terrace, outdoor entertaining in spring is ripe with possibilities. Now you can enjoy the lengthening days and cooler nights of the season in comfort, by adding an Infratech heating system to your outdoor living space.

Infratech heaters bring ambient, eco-friendly comfort to a wide range of indoor/outdoor living areas like patios, terraces, outdoor kitchens, dining or living rooms, poolside cabanas, man caves or she sheds, to name a few. The infrared quartz elements provide odorless, soundless warmth that will not interfere with the scents of a blooming garden, or blow away in windy conditions. Heaters are 90% efficient, and operate for only pennies per hour without producing the harmful emissions or negative environmental effects of traditional gas heaters. Infratech also offers an array of versatile color and finish choices, as well as four mounting options – including flush, ceiling, wall or pole mounting – to perfectly complement your space's décor – whether you're adding a heating system to an existing space or initiating a home improvement project for spring.
