

ENJOY MEMORABLE SUMMER ENTERTAINING WITH INFRATECH HEATING SYSTEMS.

[APRIL 21, 2016] GARDENA, CA – GARDENA, CA – Summer is coming, and now is the time to set the backdrop for unforgettable warm-weather entertaining around the home and garden. This year, create memorable moments by tapping into the current “glamping” trend of bringing indoor furniture outside, for a luxe, camping-inspired experience that enables guests to truly relax in comfort.¹

Whether you’re planning to kick off the season with a Memorial Day barbecue, host a Fourth of July party or Labor Day bash, or invite friends and family over for movie nights under the stars, an Infratech heating system can add eco-friendly, climate-controlled warmth to a cool summer night. With an Infratech heating system, you can even extend the outdoor entertaining season beyond summer’s traditional Memorial Day to Labor Day boundaries, bringing warmth to cool late spring or early fall nights.

Why Infratech is perfect for memorable summer entertaining:

- Infratech electric infrared heating systems operate via a heated quartz element that transfers warmth directly to objects, so it won’t “blow away” in windy conditions.
- Versatile design and mounting options – including our popular flush mount option – ensure that Infratech heaters blend seamlessly into the surrounding décor.
- Infratech offers a wide variety of control options, ranging from Value Controls for any budget to complete Smart Home integrations.
- Infratech heaters are 90% energy efficient, and operate without producing greenhouse gases, unpleasant odors or harsh glares.
- Unlike traditional gas heaters, they emit a silent, barely discernible, pleasing glow that will not impede upon the ambience of your gathering.
- They are virtually maintenance free and operate for only pennies per hour, helping you to save on energy costs.
