

ENJOY MORE OUTDOOR LIVING THIS FALL WITH INFRATECH INFRARED HEATERS FOR THE HOME.

[AUGUST 18, 2014] GARDENA, CA – Now that the summer heat is waning, it's time to step outside and enjoy the best of fall. With an Infratech heating system, you can get more out of your outdoor living space, extending the season by months – or even year-round, in warmer climates. Surround yourself with stunning fall foliage, enjoy a cup of coffee on a crisp autumn morning, share spiced cider with guests before dinner, or even move the holiday table outdoors. With Infratech heaters, you can expand your entertaining options to make the most of the changing seasons.

Infratech heaters offer environmentally friendly, energy-efficient heat and silent operation, without the harmful emissions, odors or negative environmental effects created by gas heaters or outdoor fireplaces. Lounge outside without a jacket – and without impacting the environment or running up your energy bill. They're the perfect way to get more use out of indoor-outdoor spaces like patios, terraces, verandas, enclosed areas, or any indoor/outdoor setting where heated air cannot be easily contained and re-circulated. Better still, they're available in a wide range of color and finish options, and can be built directly into a ceiling or wall, mounted to trellis beams, tucked beneath awnings, pole mounted and more, to blend seamlessly into your décor.

ABOUT INFRATECH

Infratech has been a pioneer and leader in infrared technology for more than 50 years. We offer a wide range of infrared heating products that bring casual comfort to upscale restaurants, hospitality and retail establishments, as well as private homes. We also provide a line of heating products for automotive curing and industrial/commercial heat applications. We use the latest in manufacturing technologies to offer customers the most efficient infrared systems for the lowest cost in the industry. Infratech is committed to providing high quality, innovative products that exceed our customers' expectations. All of our products are proudly made in the USA.
