

## FLUSH MOUNTING FROM INFRA TECH – A TOP CHOICE FOR LEADING DESIGNERS AND ARCHITECTS.

[JUNE 23, 2015] GARDENA, CA – Looking for a heating system that delivers maximum warmth, without compromising on style? With Infratech's flush mount installation option, comfort and ambience can take center stage.

Flush mounted Infratech heaters can be installed with exposed edges, or edges can be covered with a drywall, plaster, stucco or tongue-in-groove ceiling treatment. This enables the heater or system of heaters to deliver climate-controlled warmth, while blending seamlessly into a structure's existing décor.

It's a perfect solution for indoor-outdoor living spaces such as outdoor kitchens, lounge areas, poolside cabanas, alfresco dining terraces and more – which is why flush mount installation is so popular with the leading builders, designers and architects of today's high profile homes, resorts, restaurants and premium commercial properties. It's also why thought leaders and tastemakers are getting inspired to incorporate Infratech flush mounted heaters into their latest projects. Infratech has recently been featured in the DIY Networks' *Mega Decks*, on HGTV, and in the *Wall Street Journal*.

### ABOUT INFRA TECH

Infratech has been a pioneer and leader in infrared technology for more than 50 years. We offer a wide range of infrared heating products that bring casual comfort to upscale restaurants, hospitality and retail establishments, as well as private homes.
