

BRING ECO-FRIENDLY COMFORT TO YOUR OUTDOOR ROOM THIS SPRING WITH INFRA TECH HEATERS.

[FEBRUARY 25, 2015] GARDENA, CA – With spring just around the corner, there's never been a better time to take a fresh look at the outdoor spaces around the home. As part of a landscape design upgrade, many are looking to add or enhance features like porches, pergolas, terraces or poolside decks. While there are many factors to consider when creating an outdoor room or living space, the right heating system can maximize value by adding instant comfort and expanding the possibilities for entertaining, relaxing and more.

Infratech heating systems offer versatile, eco-friendly and energy-efficient comfort that's perfectly suited for outdoor spaces. For individuals seeking a more energy-efficient heating option to complement landscape features like low water or native plant gardens, Infratech provides a green alternative to traditional outdoor heaters. They emit an ambient, odorless and soundless glow, with no harsh glare or environmentally harmful emissions.

Infratech also offers a variety of mounting options that can perfectly complement the needs of different features. Heaters can be pole-mounted for a poolside deck or cabana, wall- or ceiling-mounted for a pergola or covered terrace, or flush-mounted into the ceiling of an outdoor room. The infrared heating elements transfer radiant warmth directly to objects like lounge chairs or sofas, and will not blow away in windy conditions. Infratech heaters are easy to install and energy efficient to operate. They provide optimal customized comfort, with a wide range of control options that range from simple on/off switches to fully integrated solid-state controls.

ABOUT INFRA TECH

Infratech has been a pioneer and leader in infrared technology for more than 50 years. We offer a wide range of infrared heating products that bring casual comfort to upscale restaurants, hospitality and retail establishments, as well as private homes.
