

## ENJOY BETTER OUTDOOR LIVING IN SUMMER WITH INFRATECH HEATERS.

[JUNE 23, 2015] GARDENA, CA – Summer is the perfect time for relaxing, entertaining and enjoying outdoor living spaces around the home. Yet nights in even the balmiest climates can bring a chill, once the sun sets. An Infratech heating system adds comfort and functionality to outdoor lounge areas, indoor-outdoor kitchens, open-air dining rooms, and barbecue bars – all without racking up energy costs.

With a wide range of mounting options, Infratech heaters are at home in any indoor-outdoor space. They can be flush mounted, or mounted to a wall, pole or ceiling, making them ideal for use in outdoor rooms, backyard pub or crafting sheds, man caves or she sheds, and poolside cabanas.

The infrared heating elements transfer radiant warmth directly to objects like lounge chairs or sofas, so heat won't blow away in a gazebo or garden trellis. In addition, Infratech heaters emit an ambient, odorless and soundless glow, with no harsh glare or harmful emissions to detract from the aromas of an alfresco meal.

Choose from a wide range of control options, from simple on/off switches to fully integrated solid-state controls that are compatible with Smart Home management systems, in order to gain seasonally appropriate warmth and comfort from Memorial Day through Labor Day, and beyond.

### ABOUT INFRATECH

Infratech has been a pioneer and leader in infrared technology for more than 50 years. We offer a wide range of infrared heating products that bring casual comfort to upscale restaurants, hospitality and retail establishments, as well as private homes.
