

DISCOVER A CLEANER, GREENER HEATING ALTERNATIVE FOR HOT YOGA WITH INFRA TECH HEATERS.

[FEBRUARY 5, 2015] GARDENA, CA – Now yoga practitioners can enjoy extra radiance during a hot yoga class – with Infratech heating systems for yoga, fitness or home studios.

Infratech heating offers the perfect combination of eco-friendly balance for any hot yoga practice. The infrared heating elements distribute radiant warmth evenly around the space, so there are no hot or cool spots. Infratech heaters operate without humidity, noise, harsh glares or odors – just a dry, silent, scentless, pleasing glow to enhance the ambience. They are easy to install, environmentally friendly, and operate for just pennies an hour, to reduce heating costs while offering the comfort of customized climate control. Infratech heating systems are available with a wide range of control options, from simple on/off switches for small spaces, to fully integrated solid state controls with programmable climate zones, to easily accommodate heating needs for different class sizes or large-scale commercial spaces. In addition, Infratech heaters are designed in a variety of standard and custom finish options, with slim profiles that can be mounted to walls, ceilings, poles or flush-mounted, to virtually vanish into the surrounding décor.
